

CartiCare Plus™
Capsules

MAINTAINS HEALTHY CARTILAGES & BONES
SUPPORTS JOINT MOBILITY

INGREDIENTS	STRENGTH	THERAPEUTIC INDICATION
Eggshell membrane	300mg	It provides both the minerals and organic matrix that is needed for correct bone growth and development. It is a great solution to increase bone density to minimize the effects produced by osteoporosis, and to shorten the time needed for bone rebuilding after fractures. It decreases joint stiffness improving the functionality and decreasing joint pain as well, therefore, elderly can improve their autonomy in terms of mobility, increasing their quality of life.
Marine collagen	40mg	Collagen helps maintain the integrity of your cartilage, which is the rubber-like tissue that protects your joints. Studies have shown that fish collagen may help improve symptoms of osteoarthritis and reduce joint pain overall.
Curcuma longa extract	19.5mg	It is used to fight inflammation and as chronic inflammation contributes to many chronic diseases, curcumin may help treat conditions including arthritis.
L-Ascorbic Acid	12mg	Vitamin C is known to be a powerful antioxidant that fights against inflammation by serving as a cofactor in the synthesis of collagen, the primary protein in both joint tissue and bone. It also fights infections that can result in joint inflammation and is highly recommended for those with compromised immune systems – especially those suffering from rheumatoid arthritis.

Description:
